Instruction sheet Read first!

Important! The cardboard and paper parts are fragile! Please work carefully, don't squeeze or force the parts. The illustrations will lead you through the process.

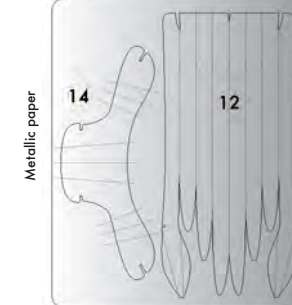

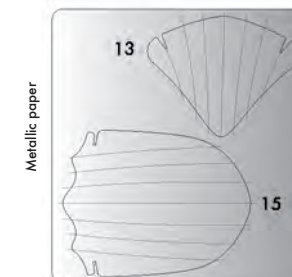

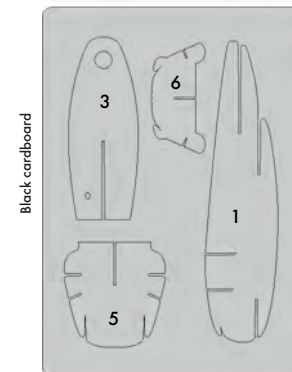

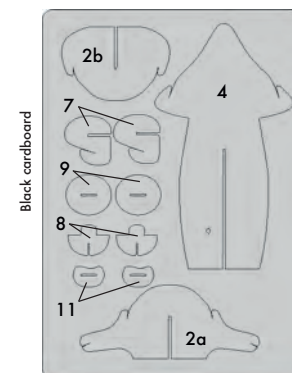

Note for the metallic paper parts: When removed, bend them only a little bit to curl the part lightly to reach the desired effect.

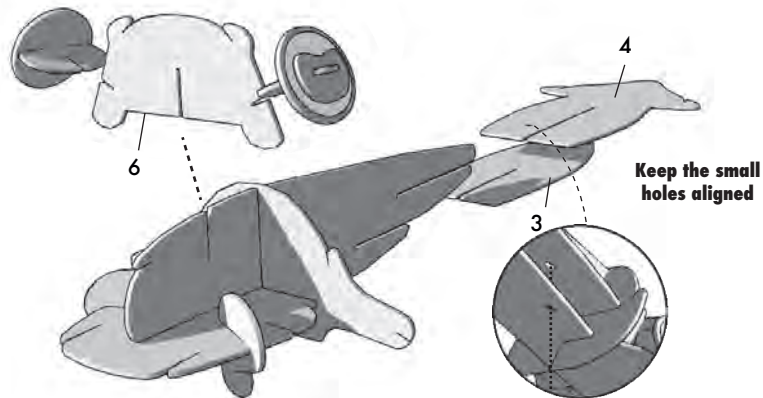

Find French & German instructions and assembling video's for more visual inspiration on **Assemblishop.com**

If these parts don't feel properly locked, you could apply a little bit of glue.

4

Clean hands in this stage will be very convenient for a nice final result!

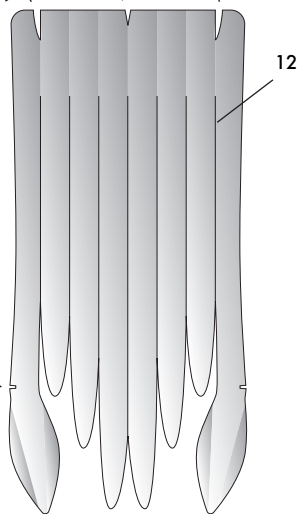

Lightly bend downwards

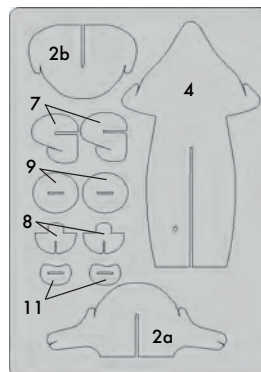

Curling the arms / tentacles
Use a round smooth object like a big permanent marker or something similar. A regular pen is a bit too thin to make a nice curl without making wrinkles. Make tests with the leftover metallic paper.

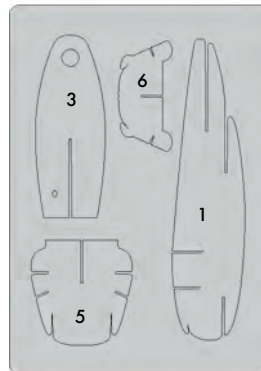

Push the strip softly with your finger against the marker and slide along the strip to make it curl a little bit.

Kalmar

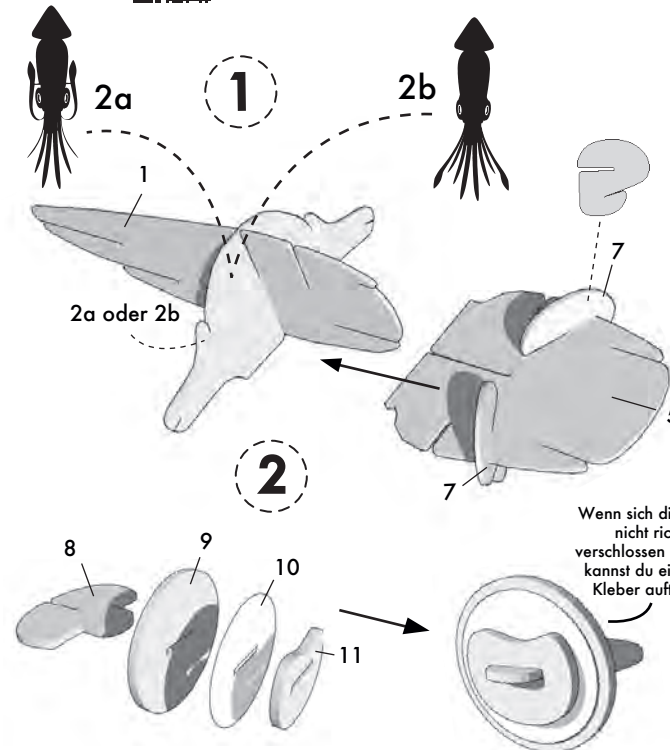

Gebrauchsanweisung Lesen Sie zuerst!

Wichtig! Die Teile aus Pappe und Papier sind zerbrechlich. Arbeiten Sie daher vorsichtig, drücken Sie die Teile nicht zusammen und drücken Sie nicht mit Gewalt. Die Abbildung führt Sie durch den Prozess.

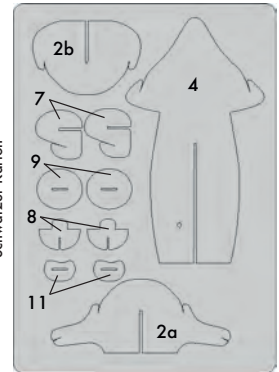

Hinweis für die Flügelteile aus Metallpapier: Biegen Sie sie nach dem Entfernen nur ein wenig, um das Teil leicht zu kräuseln und den gewünschten Effekt zu erzielen.

Feuille d'instructions À lire en premier!

Important! Les pièces en carton et en papier sont fragiles, veuillez donc travailler soigneusement, ne pas presser ou forcer les pièces. Suivez les étapes des illustrations.

Remarque pour les parties d'aile en papier métallique:
une fois retirées, pliez-les un peu pour recourber légèrement la pièce pour obtenir l'effet souhaité.

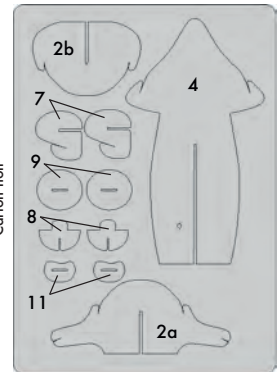

Consultez quelques vidéos d'assemblage sur **Assemblishop.com** pour plus d'informations sur la vision.

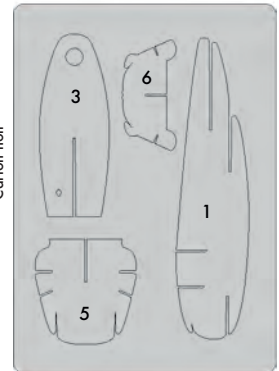

Si ces pièces ne semblent pas correctement verrouillées, vous pouvez appliquer un peu de colle.

Recourber les bras / tentacules

Utilisez un objet rond et lisse comme un grand marqueur permanent ou quelque chose de similaire. Un stylo ordinaire est un peu trop fin pour faire une belle boucle sans faire de plis. Faites des tests avec les restes de papier métallisé

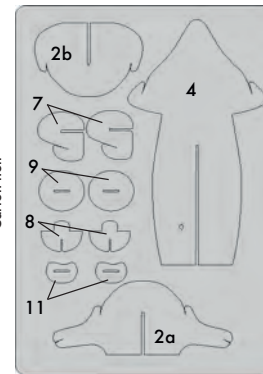

Poussez doucement la bande avec votre doigt contre le marqueur et glissez-la le long de la bande pour la faire s'enrouler un peu.
